Note: if the loudspeaker is used in 70V installations, the corresponding powers for the 100V position will be reduced to half those indicated on the switch. To one quarter for 50V installations.

WARNING! If the system is accidentally connected with the switch in the 100 V/60 W position to a low-impedance amplifier, no damage will be caused to the loudspeaker, but its performance will be well below its specifications.

7. LOCATION AND INSTALLATION

In general, the following rules will be followed:

- The unit must always be installed on firm, solid surfaces.
- Ensure that the surface on which the loudspeaker is to be installed can withstand its weight.
