Shipping dimensions (WxHxD)	320 x 165 x 200 mm / 12.60 x 6.50 x 7.87 in.
Shipping weight	1.2 kg / 2.65 lb
Finished colour	Black (RAL 9005)
Material	ABS Plastic / Steel

MECHANICAL DIAGRAM

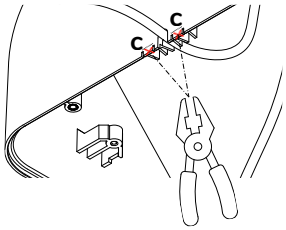

DESKTOP INSTALLATION DIAGRAM

1

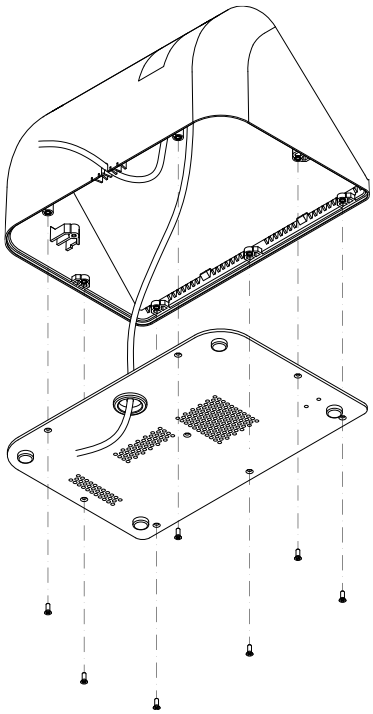

Route the Ethernet RJ45 cable and the power cable (if required) through the side entry (a) before the bottom plate is secured or through the cable entry in the bottom plate (b).

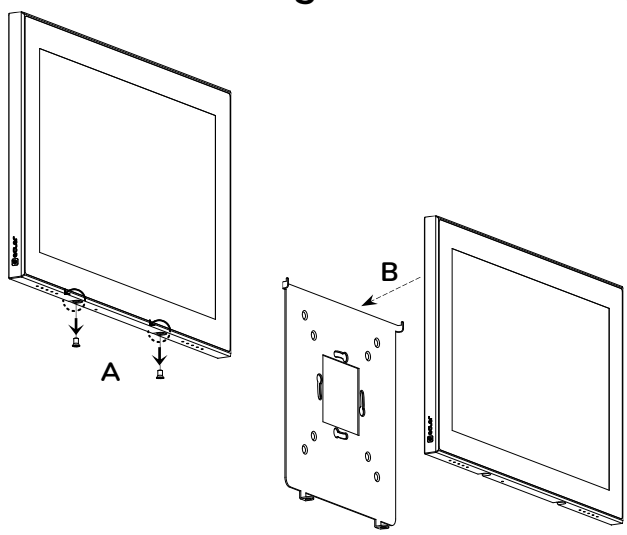

If additional space is required for cables routed through the side entry, up to two additional openings (c) can be created by carefully cutting away one or both of the tabs shown in the diagram using small cutting pliers.

2

Secure the bottom plate to the support using seven of the supplied screws.

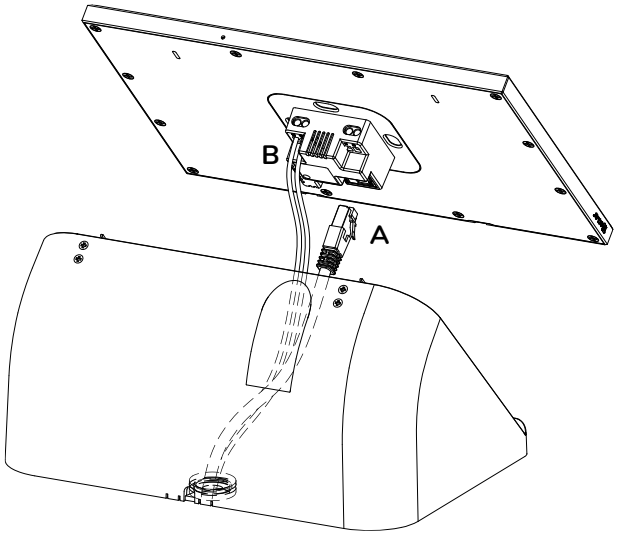

3

A. On the PULSO-10 device, unscrew the two screws securing the original wall-mount plate.

B. Remove the original wall-mount plate from the device and retain both the plate and the two screws for future use in case the PULSO-10 needs to be mounted directly onto a wall without the PULSO-DESK10 bracket.

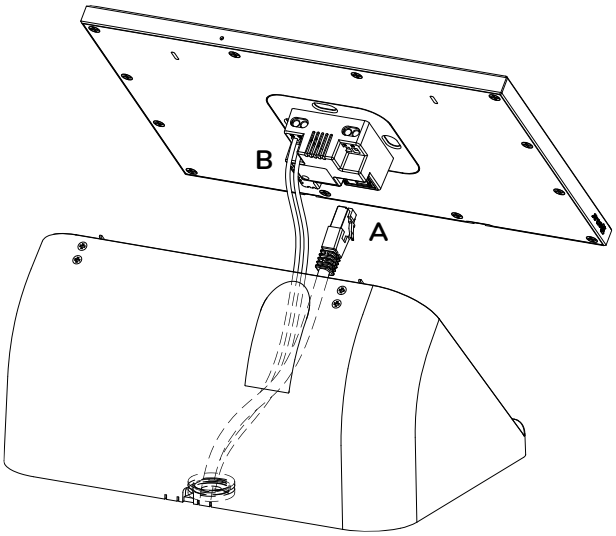

4

A. Connect the Ethernet RJ45 cable to the PULSO-10 device.

B. If required, also connect the power cable to the device.

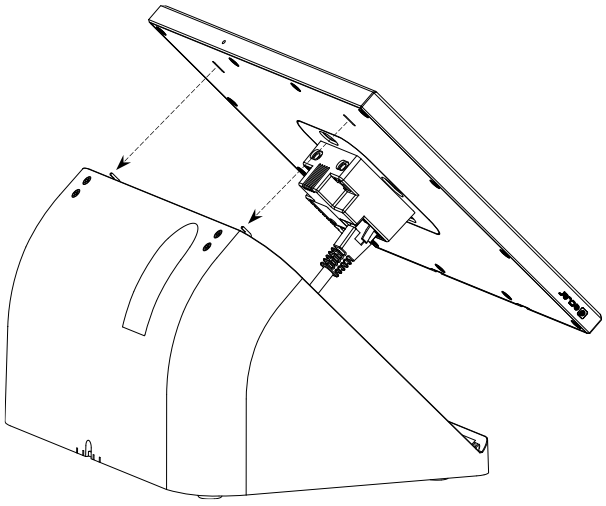

5

A. Route the Ethernet RJ45 cable through the cable entry in the bottom plate and connect it to the PULSO device.

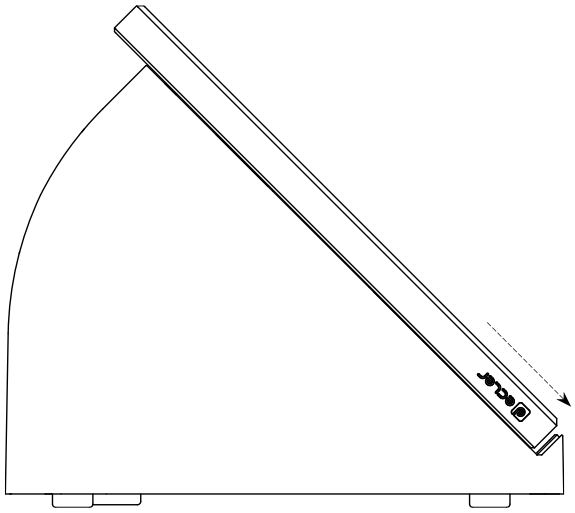

B. If required, also route the power cable and connect it to the device.

6

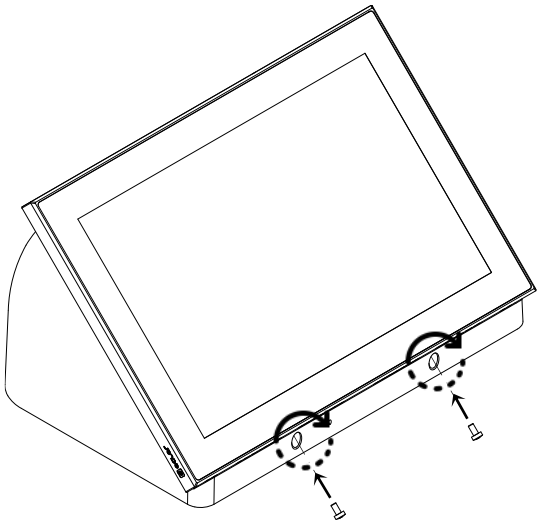

Place the PULSO-10 device onto the hooks on the desktop support.

7

Slide the PULSO-10 device downward along the support until it reaches the end position.

8

Secure the PULSO-10 device to the base using the two supplied flat-head screws.
